

User testing

Steady App MVP Prototype Evaluation Survey

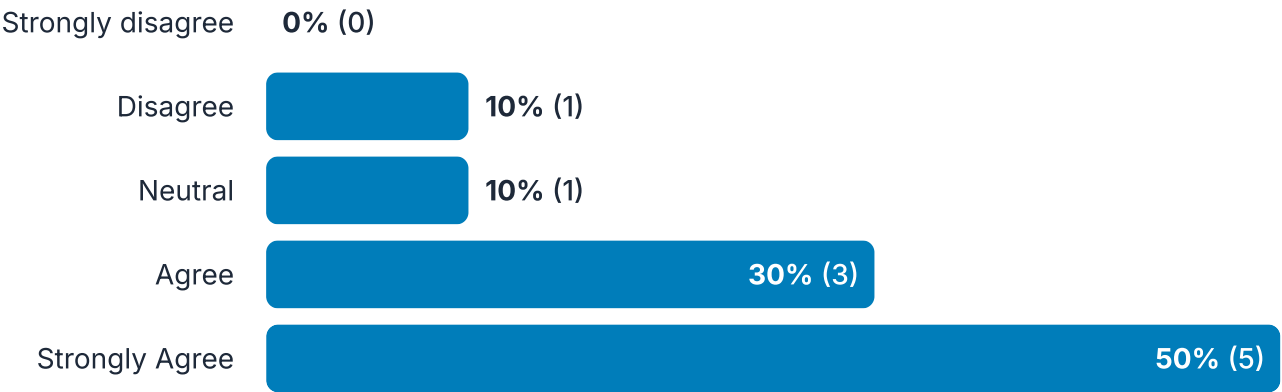

Thank you for exploring the Steady app MVP. This is an early prototype, so some features are simulated and may not be fully functional. This short survey evaluates the proposed features not a completed app. Please answer based only on what you saw and experienced. There are no right or wrong answers.

Section 1: The action-based approach

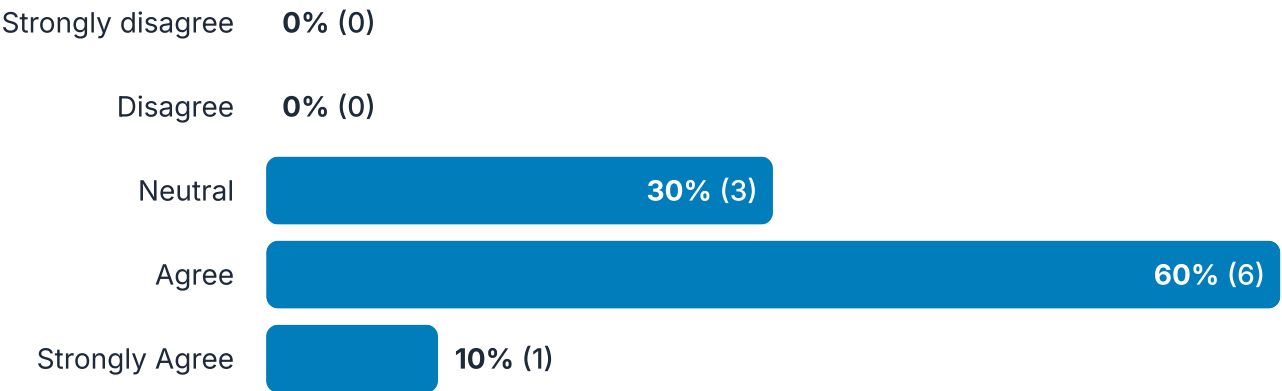

1. Thinking about the approach shown in the app prototype, how much do you agree or disagree with the following statements

Responses: 10

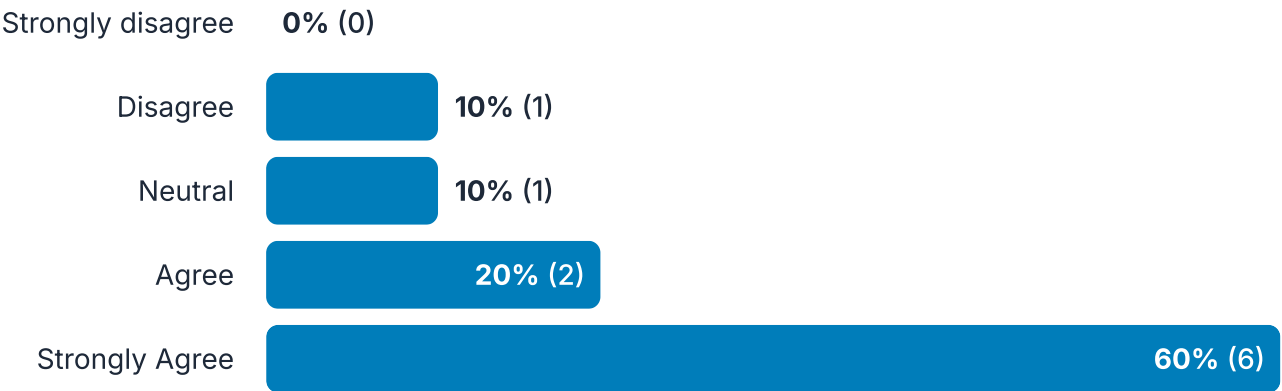

The activities presented in the Rescue Cards felt practical and achievable.

Starting with a practical activity feels more approachable than starting by discussing my feelings.

The Rescue Card approach could help me take a small first step when I am feeling stressed.

The app could help me understand which activities work best for me when I am stressed.

Strongly disagree 0% (0)

Disagree 10% (1)

Neutral 0% (0)

Agree 50% (5)

Strongly Agree 40% (4)

I would be likely to try the app when experiencing daily life stress.

Strongly disagree 0% (0)

Disagree 10% (1)

Neutral 10% (1)

Agree 30% (3)

Strongly Agree 50% (5)

Section 2: Feature usefulness

2. How useful would each feature be to you?

Responses: 10

Rescue Cards with practical activities

Not at all useful 0% (0)

Slightly useful 10% (1)

Moderately useful 20% (2)

Very useful 40% (4)

Extremely useful 30% (3)

Short reflection after an activity

Not at all useful 0% (0)

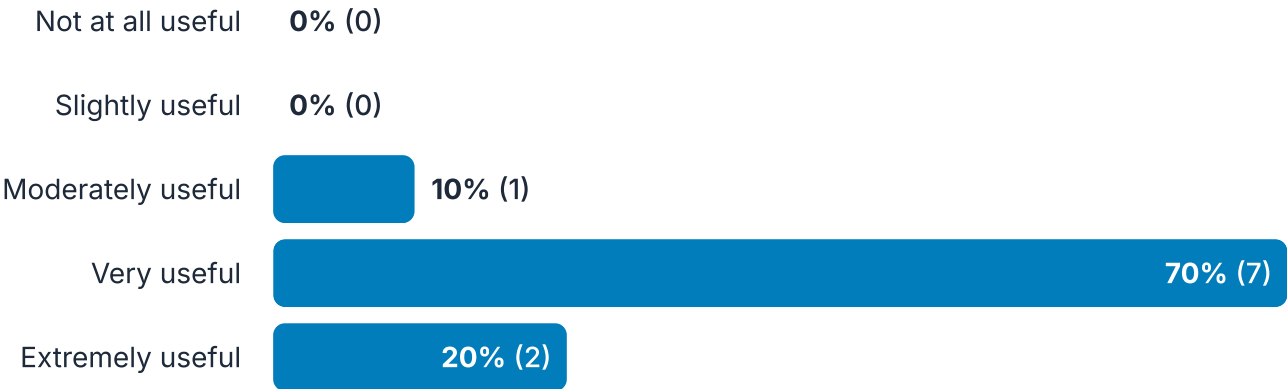

Slightly useful 20% (2)

Moderately useful 20% (2)

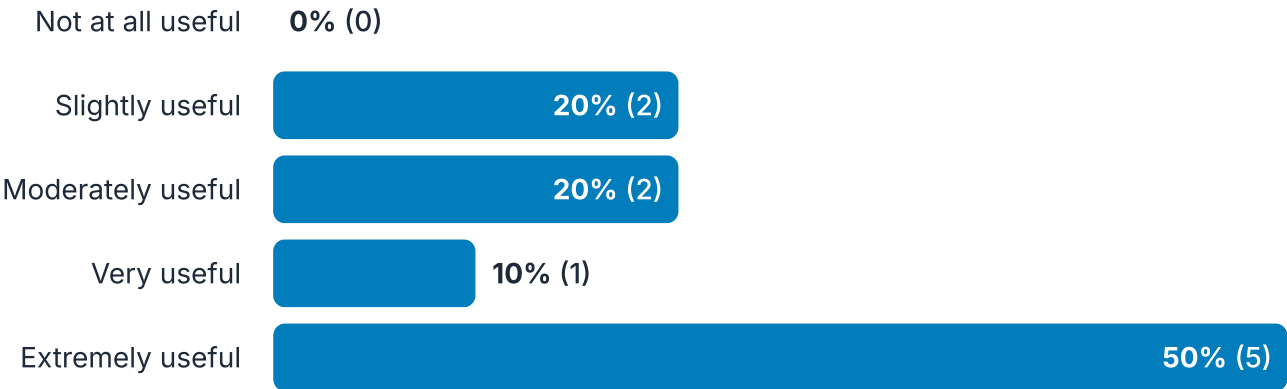

Very useful 40% (4)

Extremely useful 20% (2)

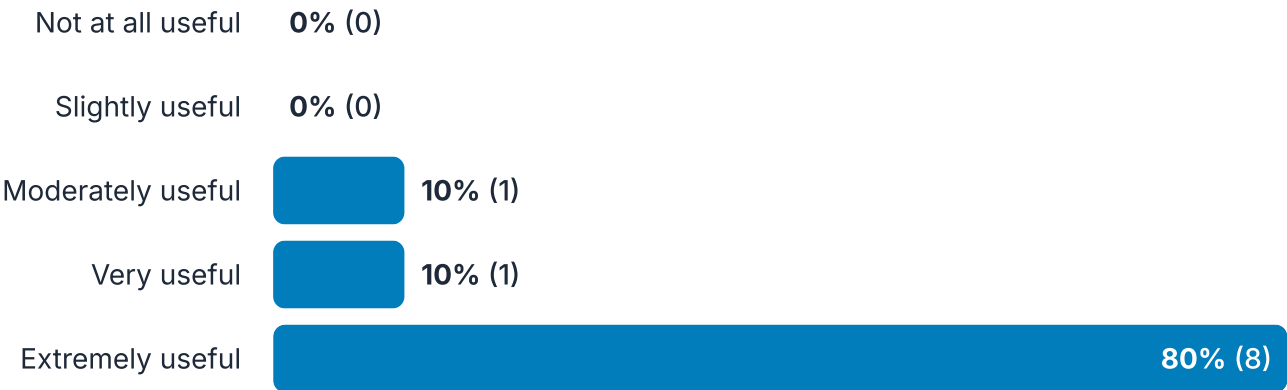

Personal insights about what helps me

Anonymous community

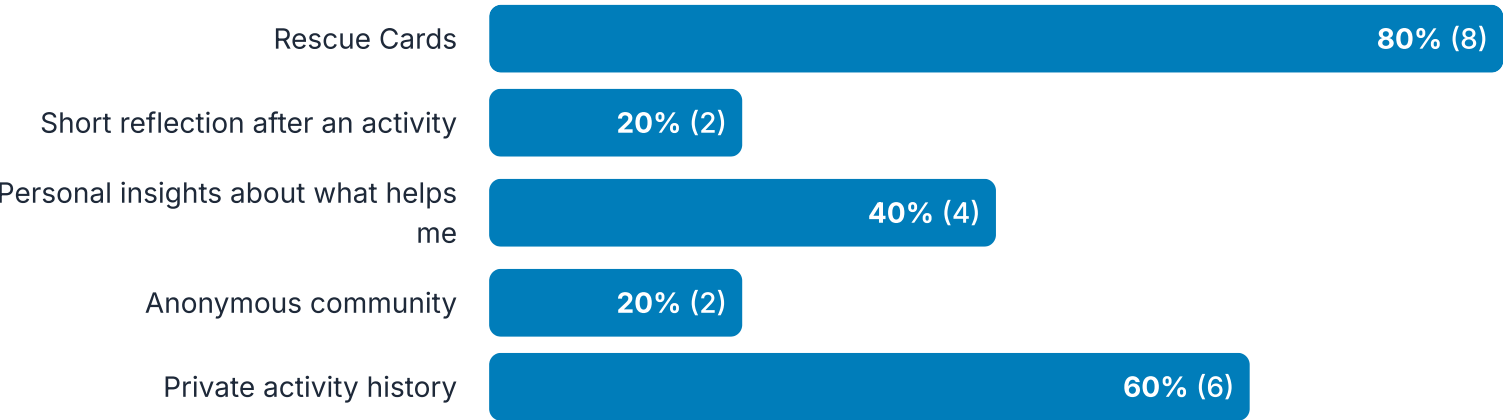

Private activity history

3. Which two features would be most valuable to you?

Responses: 10

None of these 0% (0)

Section 3: Trust, privacy and peer support

4. Thinking about the trust, privacy and community features shown in the Steady prototype, how much do you agree or disagree with the following statements?

Responses: 10

The wellbeing activities and information presented in app appeared credible.

Strongly disagree 0% (0)

Disagree 0% (0)

Neutral 30% (3)

Agree 50% (5)

Strongly agree 20% (2)

Based on what I saw, the app appeared trustworthy enough for me to explore further.

Strongly disagree 0% (0)

Disagree 0% (0)

Neutral 10% (1)

Agree 40% (4)

Strongly agree 50% (5)

The prototype made it clear what information would remain private and what could be visible to other users.

Strongly disagree 0% (0)

Disagree 0% (0)

Neutral 20% (2)

Agree 50% (5)

Strongly agree 30% (3)

I understood how anonymous participation in the community would work.

Strongly disagree 0% (0)

Disagree 10% (1)

Neutral 20% (2)

Agree 30% (3)

Strongly agree 40% (4)

The option to participate anonymously would make me feel more comfortable using the community.

Strongly disagree 0% (0)

Disagree 10% (1)

Neutral 10% (1)

Agree 20% (2)

Strongly agree 60% (6)

The community examples felt respectful and non-judgemental.

Strongly disagree 0% (0)

Disagree 0% (0)

Neutral 40% (4)

Agree 10% (1)

Strongly agree 50% (5)

Other users' experiences could provide practical ideas for dealing with stress.

Strongly disagree 0% (0)

Disagree 0% (0)

Neutral 30% (3)

Agree 60% (6)

Strongly agree 10% (1)

The community could help users feel that they are not dealing with stress alone.

Strongly disagree 0% (0)

Disagree 0% (0)

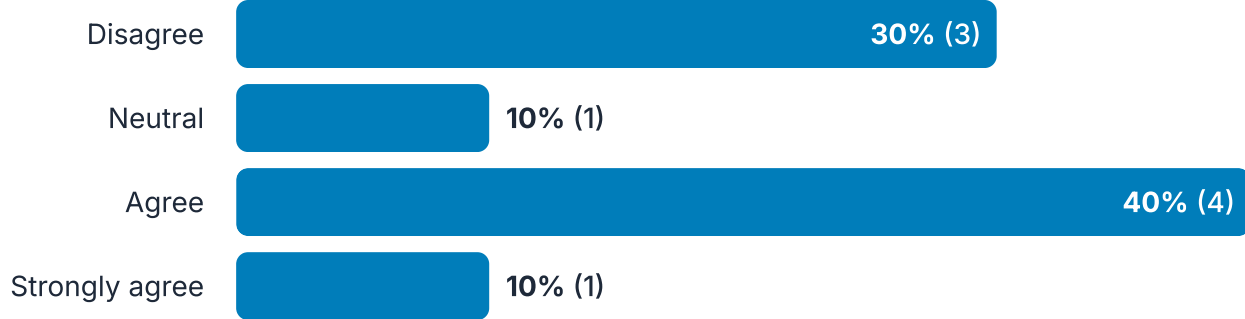

Neutral 10% (1)

Agree 70% (7)

Strongly agree 20% (2)

The prototype made it clear how harmful or inappropriate content could be reported.

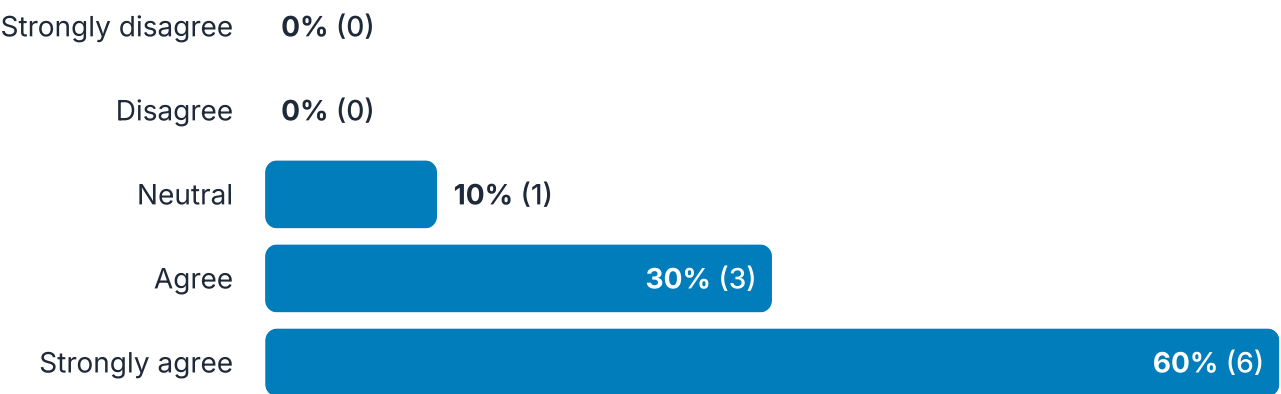

Strongly disagree 10% (1)

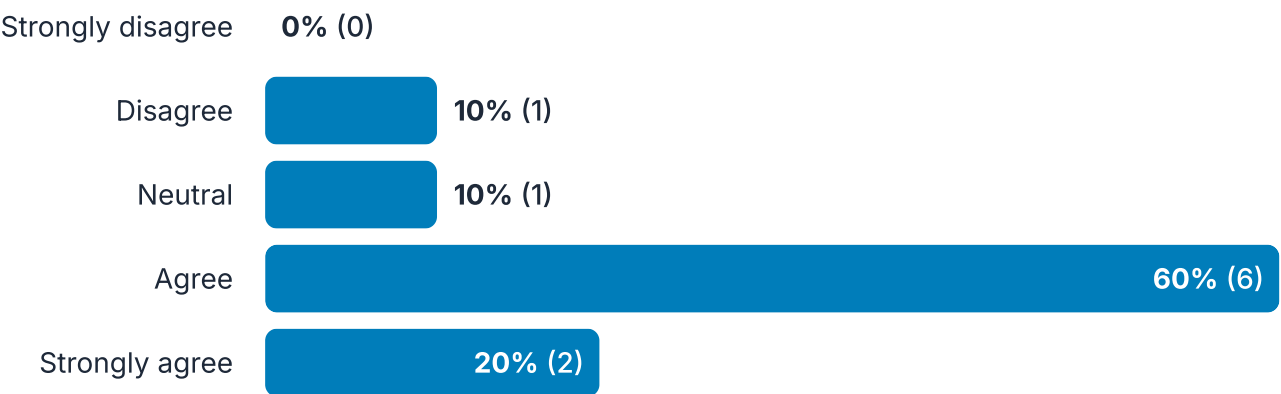

Section 4: Overall MVP experience

5. Evaluating on the basis of Usability Testing Responses: 10

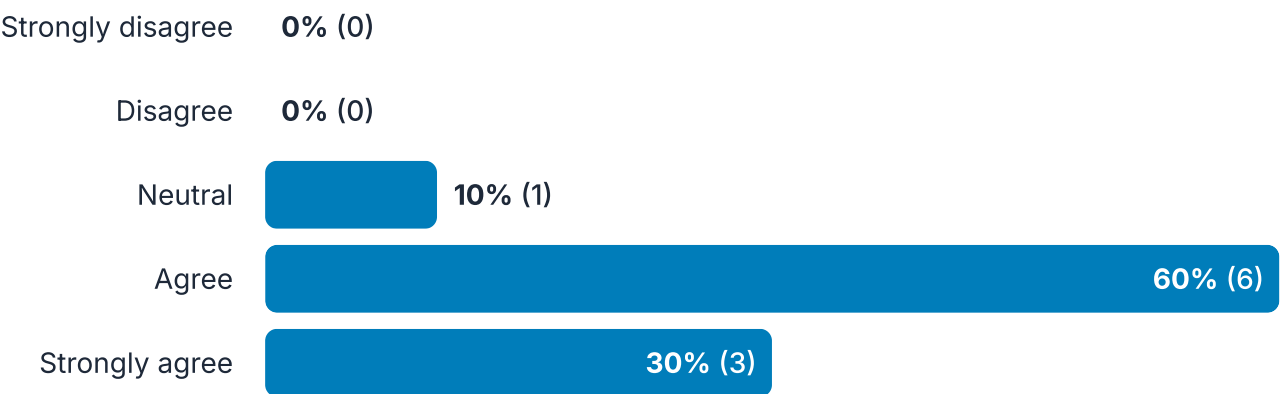

The purpose of app was clear to me.

I found the prototype easy to navigate.

It was easy to find and begin an activity when I needed one.

Based on this MVP, I would be interested in trying a developed version of the app.

Strongly disagree 0% (0)

Disagree 0% (0)

Neutral 20% (2)

Agree 20% (2)

Strongly agree 60% (6)

Section 5: Your feedback

6. What was the most valuable part of the prototype, and why?

Responses: 10

how the app listens and understands what i am facing and suggests some practical steps tailored to me

Trump cards felt like a heart to the app. Keeping the app centered around trump cards would really help me personally become more accountable, easy to use, and learn.

The most valuable part of this activity is the idea of having a "trump card" a few activities that I genuinely enjoy, am capable of doing, and can easily incorporate into my daily routine.

Anonymity, rescue card, concept of trump cards. It balances how the feeling could change with the activities on the card curated for the situation.

How easy it was to use

Asking questions about how you were feeling, what time you had and where you would be doing it before deciding on an activity to do seems like a good idea for people to actually carry out what is asked of them, and could help in narrowing down the appropriate thing for someone to do.

How and what would help me to understand

Rescue cards.!! Because I prefer something to do in that exact moment rather than just being ideal.

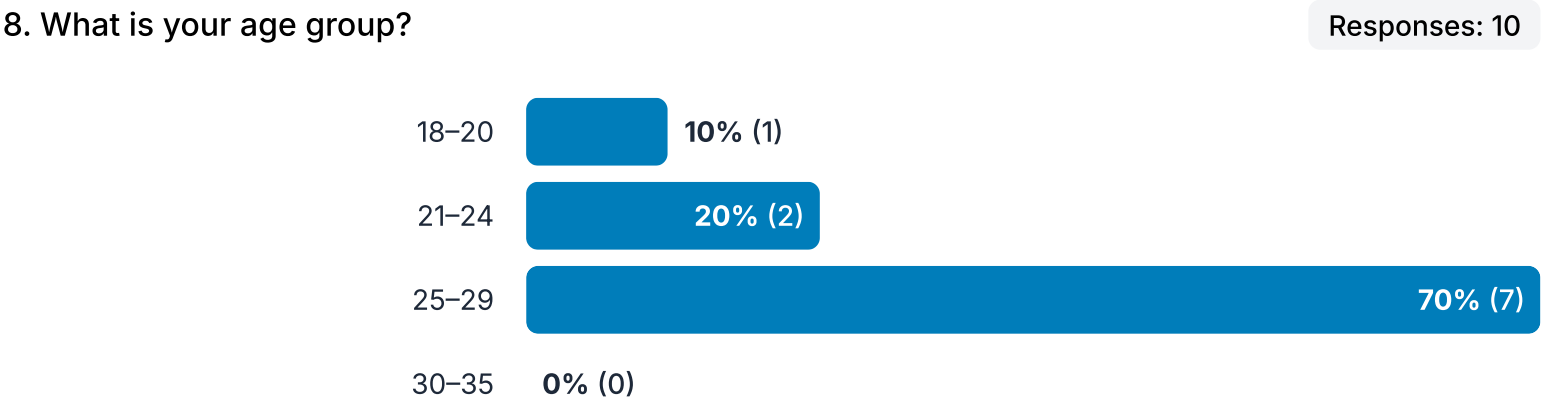

Quick and effective response

Three card and user experience

7. What is the most important concern or change you would want addressed before the app is developed further?

Responses: 10
- some parts of the interface could be simpler
- The right balance between features and purpose is very important in such self-help apps. There should be just right amount of features to assist the users and make their lives simple. If you try to make that complex, it might become tedious and frustrating to use the app itself.
- The activities that have been provided are proven to be effective stress busters and can help reduce stress, improve mood, and promote overall well-being. Another important advantgae is that these activities are practical and accessible for me, as they are activities that I am personally capable of doing and can easily incorporate into my daily routine.
- The explore section because it could be overwhelming.
- Not appropriate for those who are neurodivergent like myself, so I don't think my feedback would be appropriate
- Making the guidelines for the community section clearer, along with how these guidelines would be enforced would be helpful to giving peace of mind, but also for making sure that there is some way of dealing with people posting harmful or upsetting content in the section.
- Just making it sure it's support everyone and will help them
- App retention is the main aspect I am concerned about. Gamification with some shorts of rewards would help user to maintain active participation.
- Showing all the details at once
- Concepts design

Section 6: About you

36 or above **0% (0)**

Prefer not to say **0% (0)**

9. How do you describe your gender?

Responses: 10

Male **100% (10)**

Female **0% (0)**

Non-binary **0% (0)**

Prefer not to say **0% (0)**

Other (please specify) **0% (0)**
